

The Map

מפת לימוד

שיעור אחד = נושא אחד = סרטון אחד. כל עובדה מופיעה פעם אחת בלבד, בשיעור שלה. המספרים והטעויות שלך משובצים בפנים, לא בקובץ נפרד.

Work through them in this order

Ranked by what each one can still add: the exam's weight for the topic multiplied by how much of it you currently get wrong. Life Safety sits high because nothing has ever measured it — 6% of the exam and a complete blind spot.

#	Topic	Weight	Your accuracy	Lessons	Pages
05	Electrical	7%	64%	6	12
14	Life Safety	6%	never measured	3	5
12	Fireplaces and Chimneys	6%	73%	3	6
06	Cooling Systems	4%	60%	3	5
07	Heating Systems	5%	70%	4	9
09	Mechanical Exhaust	5%	no score, 10 misses	3	4
15	Analysis of Findings and Reporting	20%	93%	3	5
11	Interior	4%	67%	5	9
10	Plumbing	6%	80%	5	10
01	Site Conditions	5%	78%	3	6
02	Exterior	5%	78%	4	6
04	Structural	6%	83%	4	8
16	Professional Responsibilities	10%	90%	2	4
08	Insulation and Ventilation	5%	81%	3	6
03	Roof	6%	91%	3	7
13	Kitchen Appliances	—	no score, 8 misses	2	4

How these were built

Everything on disk for a topic — your bilingual notes, the gap-topic files, the practice sets, the master number sheet and all 200 of your recorded mistakes — was read, deduplicated and rewritten into lessons organised by subject. A fact appears in exactly one lesson. Where CompuCram filed a question under the wrong topic it was moved: the roof questions sitting under Exterior are taught under Roof, the furnace questions under Cooling are

taught under Heating, and attic ventilation is taught under Insulation rather than Mechanical Exhaust.

The checker confirms two things on every build: that nothing from the source material is missing, and that no fact is stated in two lessons of the same topic. Wrong answers appear nowhere — only the correct answer and the reasoning for it.

The original files are all still where they were. Rebuild with `_build scripts/build_lessons.py`.
